ERROR: "cc-1020 CC: ERROR File = /some_file The identifier "va_list" is undefined.

Published 06/30/2003

Symptom(s):

```
ERROR: "cc-1020 CC: ERROR File = /some_file
  The identifier "va_list" is undefined.
ERROR: "cc-1132 CC: ERROR File = /usr/include/stdlib.h, Line = 26
  The namespace "std" has no member "abs".

  __SGI_LIBC_USING_FROM_STD(abs)
```

Fact(s):

```
MIPSpro C   Compiler 7.4
IRIX 6.5.
MIPSpro C   Compiler 7.3.x
```

SGI Solution:

```
Use 7.4 C   compile options to old 7.3.x style behavior
   -LANG:std=off:libc_in_namespace_std=off. Installing patch
  4605 may also solve the problem.

Patch #4605 has been replaced by patch #5329.
```

Cause(s):

```
Upgrade 7.3.x C   Compiler to 7.4 caused errors
```
